"THE THREE 'R' S FOR A NEW HUMANITY"

1. Dharmic Revolution
2. Love Revolution
3. Yoga Revolution

The Author's Appeal

The three fundamental revolutions to effect an inner transformation in man's outlooks and attitudes, hearts and minds, ways and means to evolve a new Humanity is analysed in this small brochure, seeking the response of all thinking men and women, as responsible citizens of the world.

It is a moral challenge to man's reason, an urgent need for human Survival, an historic necessity, an evolutionary urge, and the call

of the " Time – Spirit " and in right response to this, consists the vision and wisdom of Man,

It is only through the collective and constructive action of all mankind, that we can avoid nuclear destruction and step in to a new era of peace and plenty, with one - world - government and give man a sigh of relief from this anxious moments.

With this tremendous impact of science and technology on human society, Man can cross continents in hours, see all events of the world on his own table, in split seconds, and with free exchange of cultures and customs. soon this world will shrink in to an exhalted status of a **Cosmopolitan Human City in the Celestial Empire.** But where is the necessary mental and moral climate to match with these dramatic physical changes ?

In this nuclear context, the continuance of " **Soverign nation states** " is an " **Out dated political anachronisms** " which every statesman should realise and opt for a " **World federation** ".

All nations can retain their full cultural autonomy, but surrender their "National Sovereignty", "Foreign Policy", 'Nuclear weapons' and "International communications" with a solemn pledge to mankind, that they would abide by the direction of "One world government" in an unilateral declaration. The elite of all nations should urge their respective governments to initiate this first practical step.

This call is in tune with the conscience of humanity, the call of all scientists and savants, the call of every one's commonsense, nay it is **Nature's Ultimatum to man** in terms of **"One world or none;" "Adopt or perish"** which even arrogant dictators can not ignore.

Half - hearted measures is no solution to an enduring peace. People every where should urge that major powers should unite and evolve a **"World Federation"** with five or six **"Sub federations"**, each under the jurisdiction of a major power and help the developing countries in a constructive aproach.

If major powers could produce more food, clothing and shelter and give more attention to health, education and recreation,

and help the under developed countries, than spend on nuclear weapons of mass destruction, poisonous and paralysing gases, which may boomerang on themselves at any moment, this world will soon be a happy place to live and enjoy.

Please pause for a while and think why this fear, tension and anxiety; Jealousy, suspicion and hatred, chaos, conflicts and confusions? Why these huge cities, gigantic factories, and monstruos machines, with so much of noise, speed and hurry; unweildy problems, all sorts of pollutions, and mental breakdowns? Why so much of attention and waste of energy on material comforts and luxuries, with its ever inreasing gadgets in never ending complexities of life, and why this mechanical and monotonous work in rigid routine.? Is this urban industrial society, conducive to real peace and happiness of Man.?

Please pause for a while and think : At what cost, we are building up this Civilisation and deluded by its glittering vanities, call it progress; what is the purpose and meaning of life? what are the true values and aspirations

of life? where is peace and happiness? Are we life-long victims to the outword glamours of Maya and its ephemeral pleasures and pay this heavy price with cut-throat competitions with our own brethern? Have we forgotten the wise ancient formula of life. " Simple living and high thinking " ?

Please pause for a while and think : that Mother Nature has extended a standing invitation to Thee, to devolop thine aesthetic refinements and enjoy in Her non competitive realms of Thought, Beauty, and Spirit, more enduring and elevating joys of life. Our ancient seers out of direct experience, have set techniques and disciplines of yoga, to tap higher powers and faculties potential with-in, and to soar high in to Heavens with thy creative spirit, than cast your eyes on the caracasses on the earth.

Please pause for a while and think : The multi millionaires in affluent countries could not find peace and joy with all their wealth and material comforts, and retiring to " Om clinics " at the countryside, converting their earnings to charitable trusts. Can we not

take lessons from this andchange? Do we need direct blows on the anvil of life, again and again to learn only by personal experience? History and biographies of great men, make men wise. What dress did Gandhi and Einstein wear, what food they ate, but what glorious lives they led?.

Please pause for a while and think : You reap what you sow and get what you deserve. For every moral violation there is an equal retribution. Blessed are those simple folk, who find their labour in tune with their nature and remain contented. Contentment is the key to happiness. Feed on Love; Rest on Faith; and Muse on Hope. The prophets did not come in vain to uphold Dharma and Preach Love and Compassion both by precept and practice.

Please pause for a while and think : That religion is blind without science and science is inhuman without Religion with the integration of Science and spirituality we get " Universal Religion " Science answers the question 'How' and Religion answers the question 'Why' One is analytical and the other is

syntyetic; One is rational and Intellectual and the other is emotional and intuitive, One is governed by 'Head' and the other by "Heart, the two poles of the same life, complementary and not conflicting.

Only wity this mature understanding we can save mankind from the impending suicidal disaster, and pave way for a new humanity. Thus, secured, Man can take to the disciplines of yoga and evoking his deeper potentialities lying dormant, that he can take a new step from "Man to superman" in "Cosmic Ascent"

Along with this earnest human effort, Pray constantly for the descent of the "Divine Grace" and the two acting together, let this fundamental Revolution for a New Humanity be soon a Reality. Through active participation in this "Triple revolution" Dear Brothers and Sisters, have the proud previlage of vindicating the 'Honour and Dignity of the Human spirit.

What is Dharma ?

it is the natural cosmic law applied to different aspects of social life. as the 'CONDUCT OF LIVING', as the 'PRINCIPLE OF RIGHTEOUSNESS', A 'GOOD SOCIETY' can evolve and flourish only on a well based, 'SOCIAL ETHICS - DHARMA'

What is Good, Natural and Just, all blend in 'ONE' is 'DHARMA' What upholds this Universe and maintains, Order, Balance, Rhythm and Harmony in the Cosmos is 'DHARMA' and that which is unjust and Cause, chaos, conflict and suffering is 'ADHARMA'.

'DHARMA' IS THE 'MORAL LAW' OF THE UNIVERSE - THE 'COSMIC LEGISLATOR'

'THE LAW OF KARMA', IS THE 'CAUSAL LAW' OF THE UNIVERSE, THE '' COSMIC EXECUTOR''.

The Law of causation is the foundation on which the edifice of Science and Reason is built. Every Cause has its effect, every action

has its reaction, every moral violation has its equal retribution, sooner or later, and 'MAN REAPS WHAT HE SOWS'

This Cause-effect sequence regulates "DHARMA" in the universe. It is Cosmic Command and no one Can cheat its cosmic mathematics. This inexorable Law of Cosmic Causation fulfils 'COSMIC JUSTICE' at all levels of existence.

It matters not, whether one is a Theist or an Atheist, whether one is tuned to a "PERSONAL GOD" or an 'IMPERSONAL LAW' but what really matters is whether One is Dharmic or not.

The essential Core of all Scriptues is "DHARMA", though it is explained in different names and in different ways. It is the "CRUX OF ALL REVEALATIONS".

Violate Dharma, the Law of Karma holds thee by thy neck, and extracts equal retribution sooner or later, some time, some where, with an appropriate fruit at a propitious time, as the Karmic seed matures.

It's cause-effect sequence is too subtle and too Complex to trace by the limited intellect of man. It operates in all the three planes, Physical, psychic and spiritual, transcending "Time-Space" limitations of the Physical plane.

Gods and men, Heavens and earth, are all bound by the Moral Law of Dharma, and the Causal Law of Karma.

All our motive, thought and action, are recorded in the split-second. automatically in our psychic Centre of Chitta. as Psychic imprints and bear eternal witness to all our motivations. These subtle, secret. internal records in our "CHITTA", are our "CHITRA GUPTAS".

All our intentions, thoughts and actions in tune with Dharma is our 'PUNYA' and that which goes against it is 'PAPA'. These are our debits and credits in the 'BOOK OF LIFE', embeded as our VASANAS AND SAMSKARAS". At the time of death, this 'PSYCHIC CENTRE' tags on to the 'SOUL' as our "LOAD OF KARMA", and carried on from life to life as our "PRARABDA KARMA"

Sri Vidyabharathi Book Centre, Sringeri

Death is only an interval for the soul between this life and the next. During this gap, the "Cosmic computer" examines the "BOOK OF LIFE", draws the balance sheet of one's credits and debits, and determines the next parentage, a suitable environment for further evolution of the soul.

At the time of death, the soul strips off the worn out physical body, and enters "A NEW BIOLOGICAL MECHANISM" WITH A 'NEW PARENTAGE'. The physical body decomposes and merges in the "FIVE PRIMARY ELEMENTS". The soul continues its Spiritual Journey, with its cycle of births and deaths, till its prarabda exhausts.

LIVE IN TUNE WITH DHARMA, THE KARMA BINDS NOT"

Dharma finally leads you to 'Moksha'. to the blissfull state of 'SAT-CHIT-ANAND'.

Knowing the nature of 'fire'. we dont thrust our hands in to it and burn and so also the wiseman, knowing the inexorable effect of the law of karma, does not

violate dharma and suffer. With out this "MORAL LAW" operating, this whole universe will be chaos and not cosmos, and disintegrates in moments.

So, living in tune with Dharma is all important.

Buddha rejected Vedas and its Rituals, but soon came out on enligetenment, with greater. emphasis on the twin cosmic laws of dharma and karma and gave to his disciples the "FRAME WORK OF DHAMMAPADA" "THE PATH OF DHARMA".

"OUR VEDIC CULTURE" Sanathana Dharma - "THE ETERNAL LAW OF LIFE", in its integral coprehension, embraces all revealations and finds due place to it in the "COSMIC SCHEME OF LIFE".

Dharma is inherent in every man as the inner voice of Concience. but the noise of 'Ego' eclipses the "SILENT VOICE OF THE HRART". Heading not the voice of dharma, the mighty monarchs have perished, great civilisations have sank and arrogant dictators are checked out of existance.

All political ideologies born out of relative, limited intellect of man, in angular visions, emphasising some aspects of life at the ocst of other aspects, invites reaction by the play of opposites and perpetuates ideological conflicts.

What is intellectual polemics in the hands of political thinkers, will soon be reduced to fanatical fights in the hands of political demogogues.

All party politics, finally culminates in power politics. It is a veiled and camouflaged "EGOTISTIC ACTIVITY" in the name of high theories and principles, by ambitious politicians, with craze for power, position and self importance.

These political demogogues, hypnotise ignorant masses, with empty slogans and false promises, grab their votes and usurp power.

The sacred political power is put to public auction at the market place, that demogogues with unscrupulous arts and crafts of public propaganda may grab it in the name of high principles.

People's representation is a political myth. perpetuated by vested political interests. Who represents whom? The sacred political power is put in to wrong and unworthy hands.

The politician is at the core of all mischief and these Rajasic men projecting personal and national egos, are creating all havoc. Many of them are good as executives, but stupid and arrogant as legislators. The cosmic guidence should come from satvic men, who are mild and hidden from the lime light of publicity.

One who does not understand the full significance of the moral law of dharma, is unfit to be the ruler or legislator of this "SACRED BHARAT", ordained and destined to guide the rest of the world, by virtue of its glorious cultural heritage.

"DHARMIC REVOLUTION" is the urgent need of the hour for human survival. Dharma is meant not only for Bharat, but for all mankind. Thinking men and women all over the world, should realise this urgent and vital need, effect a "WORLD DHARMIC REVO

LUTION", before it is too late and pave way for a world government, a world federation, with A SANE WORLD SOCIAL ORDER.

The law of karma operates not only in the individual life, but also in the collective life of a nation and in the collective life of all mankind.

DHARMA being universal and impersonal is ment for all human beings on this planet.

So DHARMA is the frist lesson that every one should be taught, every where, by every means in all its aspects, with all its rational and scientific significance as the Moral Law of the Universe.

This is the crux and quintessence of human Knowledge, begining of all Education, the Heart of social life.

With out the clear understanding of Dharma, man is unfit to be called a Rational Being and much less a Citizen of the World.

The Fundamental principles of Dharma is true for all times, only its outward forms

need necessary adoptation to suit the changing conditions and contexts.

DHARMA should permeate the social conciousness of people every where and all thinking men and women of the world should unite and effect a "DHARMIC REVOLUTION".

Only a dharmic revolution can ensure human survival and pave way for an enduring peace and prosperity for all mankind.

LOVE REVOLUTION

What is Love ?

"Love" is freely talked about in daily usage, but rarely understood in its true significance. This mystic feeling in Sublime ecstacy elludes all verbal explanations.

" Love transcends Dharma "

It is the Feminine Mother Principle of the Universe "**Prema**" that has edge over the Masculine Father Principle of the Universe "**Dharma**".

Vedas proclaim "Mathru Devo Bhava" Pithru Devo Bhava, Acharya Devo Bhava and so on. The Mother Principle is given the Foremost place of Honour.

In " **Sri Chakra** ", the mathematical symbol of the Universe, out of nine triangles, five belongs to Shakthi and Four to Shiva, indicating that Mother principle has an edge over the Father Principle.

These two Parent Principles of the Universe "**Dharma and Prema**" maintains Order, Balance, Rhythm and Harmony and upholds and Sustains this Universe.

Pure Love in free Self-expression is Self-abundant in Blissfull ecstacy. It is pure Subjective Atmic state of "**Sat-Chit-Anand**" where "**Ananda**" emerges in a jet spring and Pervades the whole Being with its Blissfull vibrations in Sublime ecstacy. It is the play of the "**Subliminal emotional energy**".

Here, there is no any kind of Seeking or Sensual desire. It is full to the brim of its own "**Ananda**" and radiates Sweet ecstatic joy all round and is free from all motivations.

In this Sublime exhalted state, One is naturally and spontaneously in Best of moods, with sweet conduct and behaviour, what no ammount of artificial disciplines could reach.

"The whole Creation has emerged out of Ananda and all Souls pulsate towards Ananda and finally merge back in to the Blissfull ocean of Ananda"

CC-O. In Public Domain. Digitized by eGangotri

Every one gets a glimse of this exhalted state in enlightened moments of life, lika a lightening flash. but no one can grip it. It is the great previlage of the Divine Mother and Her Grace alone can confer it.

It is the Atmic state o " Love itself " purely subjective, and it is the "First Phase" of Love, " Swaswaroop ".

In the second place, it takes an objective turn and involves Social relationship.

Here the two kindred Souls in pure Spiritual affinity seek one another's merger in all the planes, physical, psychic and Spiritual in a bid to loose one another's seperateness and seek to identity totally and fully in " Pure Bhava ".

" When Love Springs up, Ego Submerges ". Here there is no sensual desire, seeking of any kind and is free from all motivations. It is the spontaneous urge of the kindred Souls in pure Spiritual affinity, where Hearts meet, Souls embrace in the merger of the two Beings in " Pure Bhava ".

CC-O. In Public Domain. Digitized by eGangotri

In this Spiritual Love, 'Sex' is not the primary motivating factor, but 'Sex' is not excluded in its "Spontaneous Free Self-expression".

In the beginning of Creation Paramatman projected, the two poles of Life, Purusha and Prakrithi for the purpose of Leela. The two poles, Masculine and Feminine Spontaneously Came together in Spiritual attraction and in Free Self - expression, indulged in 'Cosmic Romance' "Cosmic Dance, Cosmic sport" and "Cosmic Leela"-'the Surging Souls in Sublime ecstacy'.

Radha's Love for Sri Krishna was of pure Spiritual affinity, expressed in Pure Bhava, "Krishna Conciousness" Here, there is no need for the physical presence of the Beloved. It is expressed and felt in "Pure - Bhava" spriritually and it is termed as 'Platonic Love'

Gopis imbibed this "Madura Bhava" from Radha and later on expressed 'It' in "Rasakrida". Here there is no pining for the physical presence of Krishna or any kind of sensual desire and free from all seeking floating in the Blissfull Ocean of "Transcendental Conciousness".
